

## **NEWSFLASH**

### **Fluorescent Tube Recycling - Changes in the Law**

As you may be aware, new legislation will be enforced in August 2005 concerning the recycling of used fluorescent tubes and other hazardous materials.

Wiser Recycling provides a recycling service to help companies, councils and schools to comply with this legislation. We have developed the most practical, environmentally friendly and health & safety conscious disposal method available.

The TubeEater safely fragments used fluorescent tubes and we provide an on-site service to fragment and remove your tubes for recycling. We have also designed a purpose built, upright and secure storage locker for the safe storage of tubes.

With this in mind, Wiser Recycling would like to offer our service to schools in your area. Our proposed scheme is to supply the major schools in the area with a 'tubestore' which we will empty on a regular basis - the smaller surrounding schools can deliver their used tubes to the nearest allotted school with a tubestore.

The benefits of using our service:

- Cost effective, reducing volumes and costs for the storage and transport of used fluorescent tubes
- Minimises the hazards of broken glass shards for unforeseen breakages
- Self contained machine, minimising exposure to mercury vapour and phosphor dust
- Fully mobile for transporting on and off site
- Can safely process up to 300 fluorescent tubes per hour
- Significantly reduces space required to store used tubes
- Environmentally friendly and legislation compliant

For more information on our recycling scheme please call 01480 464111 or visit our website at [www.tube eater.com](http://www.tube eater.com) for a video demonstration.
