

When the **sun shines** do you long to get the children out **exploring the natural world**?

Why not come and **enjoy autumn** with the **RSPB at Whitlingham Country Park**.

We would love to welcome you to join us in exploring the wildlife at Whitlingham. Observe nature as it readies itself for the change of season. See the fantastic autumn colours, learn about seed dispersal, migration and hibernation. Our experienced field teachers will help you enjoy and identify the birds and wildlife around the Country Park during this exciting season of change.

To help spark children's interest in the natural world our autumn programme offers a range of activities exploring nature through mini beasting in our woodland or meadow areas, or bird watching by the Whitlingham Broad. Alternatively, why not select one or more of our **new autumn activities** listed below:

- ✓ Autumn art activities using natural materials
- ✓ Seed dispersal
- ✓ How animals and birds prepare for winter
- ✓ Colours of Autumn
- ✓ Winter birds at Whitlingham
- ✓ Environmental games

Alternatively – if you can't get to us we will come to you!!! An outreach visit could be arranged to your school to explore the wildlife around your school grounds. We would love to share our enthusiasm for wildlife with the children in the hope that they too will be fascinated by the captivating world around us!

For further information or to make a booking please contact Tina Anderson, Lead Field Teacher 01603 429901 or see our website: [www.rspb.org.uk](http://www.rspb.org.uk). Our educational programme has been designated Category A by Norfolk County Council. All our programmes are linked to the National Curriculum for EYFS and KS 1 and 2.
