

Norwich Talks

The Story of the Universe

Man's conception of his cosmos from the early days of Earth-centred universes to the current Big Bang model. The Big Bang model is explored and an attempt to explain some of the commoner misconceptions about a four-dimensional universe is made with the aid of a sophisticated (!) analogy.

Talk by **Pam Spence** MSc

Fellow of the Royal Astronomical Society, past Editor of Astronomy Now and Managing Editor of the Encyclopedia of Astronomy and Astrophysics

Friday 8th March 02

**At The Hewett School
Hall Road, Norwich**

**Parking
available**

7.45 for 8pm

£2, £1 under 16s

Norfolk Astronomers

is a rapidly growing society serving Norwich and Norfolk. We are building an advanced observatory under a dark night sky at Reepham High School using the latest technology to enable research-standard work and education to take place. Solar observations will be made using a helioscope. A link has been made between Reepham High School and the Hewett School for radio and optical astronomy and further links with

other Norfolk Schools are envisaged in the future. Apart from talks at the Hewett School there are observing and meeting nights at Reepham High School on the first Friday of every month. These will be extended as observatory building progresses.

New members of all stages of experience in astronomy are very welcome. Membership application form from the Membership Secretary: Margaret McArthur, 2 Rookery Farm Cottages, Reepham, Norfolk, NR12 4JW.

*** Please display this poster for the furtherance of Astronomy Education**
