

September 2003

F.A.O. : Head of Mathematics / Co-ordinator of Mathematics

Dear colleague,

The Autumn term is under way again, and the Norfolk Branch of *The Mathematical Association* has its programme of meetings and events for the forthcoming academic year already published. Our complete programme can be found on the national web-site at www.m-a.org.uk. As usual, though, may I take this opportunity to highlight this term's two main events?

THURSDAY 25th SEPTEMBER 4.30 pm
Notre Dame High School, Surrey Street, Norwich
(Directions are available if required)

‘NRICHing Mathematics for Everyone’

A presentation given by

Jenni Back
of
NRICH

A few years ago, NRICH led a very successful Saturday workshop for Norfolk MA, and now we have invited them back to give us an update on their work, as well as provide us with some more stimulating mathematical ideas and useful contacts.

[There is no necessity to book for this meeting. All are welcome. There is no charge for members and only a small charge for non-members. As with all events, it is possible to join the Association at the meeting.]

WEDNESDAY 12th NOVEMBER 2.00 pm
UEA Lecture Theatre 1
THE ANNUAL SIXTH FORM LECTURE

‘HOW TO CHASE A SUBMARINE’

given by

Dr Tom Korner
of
Cambridge University Department of Pure Mathematics

Further details and a booking reply slip will be published later in the term as usual

Best wishes for the term,

Administration Secretary
