

What is the OURSCHOOLS website?

This resource is designed to stop the need to wade through lengthy documents sent to you by national sources. The site carefully highlights only those documents or issues relevant to primary schools and summaries are produced highlighting deadlines and the main issues. The site includes:

Education headlines updated daily Consultation summaries and reminders Summaries of lengthy DfES, QCA and OfSTED publications All documents relevant to primary schools selected Reminders of approaching deadlines Special Governors area Special Small Schools area

The site's aim is to help you in keeping up to date with education news and to give gentle reminders of approaching deadlines thereby releasing your time for other more pressing tasks. It was originally created with Headteachers of small schools in mind, but it has evolved into an invaluable resource for teachers, administration staff, governors and advisors as well.
