

Free Energy Display Meters for Schools

The Department for Children, Schools and Families and Partnerships for Schools are running an exciting new initiative to get Energy Display Meters provided and installed into English state-funded schools, absolutely free.

This is a fantastic tool for getting pupils and teachers excited about monitoring electricity use and actively engaging them in sustainability issues. It works by monitoring your electricity use and displaying real-time results on your schools PCs.

Along with Partnerships for Schools, Generation Green and British Gas, the Department for Children, Schools and Families aims to generate more awareness of energy usage amongst teachers and pupils, and an understanding of how behaviours can affect this.

Benefits for your school

1. Free Energy Display Meter, linked to your schools PC network
2. Increased energy awareness amongst pupils and teachers
3. Excellent customisable teaching tool that is easy to use
4. Engaging teaching resources and lesson packs to educate pupils on energy usage

For more information please visit the [Free Energy Display Meter](#) web site now.
