

AbilityNet Training Courses

AbilityNet is a national charity helping disabled adults and children use computers and the internet by adapting and adjusting their technology. Aimed at professionals in education, personnel, occupational health, equal opportunities and staff welfare, we are offering the following training courses...

Effective Assessment of Problems at Computer Workstations

Employers are required to have a process of workstation assessment for all employees who use computers. When this process identifies a problem, or the employee reports a difficulty, the employer must further assess the situation in order to recommend and implement any necessary changes. This course aims to help those involved in workstation assessments respond effectively to reports of a problem and develop suitable solutions.

Using ICT to Support People with Dyslexia

As we become more aware of how widespread dyslexia and other reading and writing problems are and how limiting their effects can be, there is a need for earlier identification and more effective remedial action. Computers are an extremely effective tool in making this possible. This course will equip delegates with information on software & hardware that helps those who have a reading & writing difficulty. At the end of the course, you will have a greater awareness and practical knowledge of how the computer can be used to help address reading and writing difficulties, such as Dyslexia.
